Yet another land grab (sent to us by Ray Decker)

We formed AMRA to keep everyone educated on what is happening to our rights, and our lands, repeat "OUR" lands. BLM, an agency formed to manage our lands has published another piece of land they are making off limits unless we, the people stand up and say no.

The comment period to oppose this is November 25th so time is short. We urge you to respond to this immediately with your comments if you oppose this. Don't just read this, be heard. If you do not respond, they will just designate more and more lands as off limits to the public and small miners.

Simply click on the link, and then on the "comment card" and send in your comments. These people rely on a sleeping public, do not be asleep.

November 17

Just in case anyone has forgotten what FDR did back in the 30's. And with the Swiss voting Nov. 30th on returning to the gold standard (upsetting the European nation's banking system) things like this might repeat themselves:

[http://en.wikipedia.org/wiki/Executive\\_Order\\_6102](http://en.wikipedia.org/wiki/Executive_Order_6102)

Executive Order 6102 - Wikipedia, the free encyclopedia

en.wikipedia.org

Executive Order 6102 is a United States presidential executive order signed on April 5, 1933, by President Franklin D. Roosevelt "forbidding the Hoarding of gold coin, gold bullion, and gold certificates within the continental United States". The order criminalized the possession of monetary gold by...

American Mining Rights Association

November 13

This is an important post from AMRA:

Two weeks ago, I received a certified letter from the EPA threatening me with imprisonment and fines of up to \$525,000.00 for dredging without an NPDES (pollution discharge permit from the EPA). I did possess a valid permit issued by the State of Idaho. We dredged our own AMRA claim this past summer in opposition to the EPA's extreme, radical, overreach of the clean water act (CWA) and to support the small miners in Idaho who were being constantly harassed by the EPA. They have demanded I answer a bunch of questions (or face imprisonment and fines) such as: how much pollutant (gravel) did your dredge move, how many horsepower, size of dredge, send them all video, who was with you etc... There are numerous questions and we won't disclose everything here. We are sending them our response today and will let you know what transpires. The EPA has already lost several high profile court cases on the CWA and the courts conclusively state the EPA does not have the authority to regulate "fallback" which is precisely what comes out of the back of a dredge. Moving material a few feet from one portion of a stream to another is not pollution. Dredging removes 98% of the mercury and nearly 100% of the lead. But this does not stop these radicals. They allow Sierra Fund (a radical environmental group in CA) to dredge with a destructive cutter dredge and in fact have received tax payer funded grants of over a million dollars to dredge. Their dredge only removes 84% of the mercury. See the hypocrisy here? If you are a radical environmental group aligned with their agenda.....you can dredge without any consequences, but those who uphold the Constitution and freedom.....you get punished.

We knew this was coming, and we are going to fight this extreme, radical agenda of these people and are prepared to take this to the Supreme Court if necessary.

This is why we formed AMRA. To represent the small mining community and public land lovers all across this great nation. We ask that you stand with us, speak out with us and support us as we take on this behemoth. This may be costly, but it is absolutely critical we stop this agenda. Our future generations depend on it. The EPA right now is trying to regulate "every wet spot in America". This is the language they are using. This doesn't just affect mining claim owners but private property owners everywhere.

We also have many other issue's we are working on and are still representing many, many small miners with issue's with BLM, USFS and other alphabet agencies. The two men who were cited for suction dredging last summer have their first court appearance Monday, AMRA is representing them. We are proud we are helping these people when they had nobody else who would listen or help them. We do this at no cost to the miners.....all from donations. We've built this business to support you.

We've expanded our claims, and are continuing to do so with the hopes that people will see the benefit of AMRA.....tax deductible donations and unlimited access for your whole family to all our claims. 25+ claims now in CA, from San Luis Obispo, to the Mojave, to the Feather, NF Yuba and 18 claims between Sonora and Mariposa. Claims in Idaho and Arizona. We are working on claims in Washington and southern Oregon as we speak. We are working on some claims near Sacramento (yes Max, we have a location for you) and up out of Quincy. Good claims.....AMRA quality claims.

With your help, we can grow AMRA into the nations largest advocacy group for small miners and public land access. The NRA started small and grew and grew.....

Join us, we are going to need everyone's support to stop what is happening to our rights. But, stop them we will, come hell or high water.

The EPA is simply the weaponized agency which does the bidding of the current Administration. They know they must take over the water, every single little drop of it or the people are still free which own private property. It doesn't take a brain surgeon to clearly see this is about control, absolute and complete control of the people. This is the "fundamental transformation" someone was talking about. Unfortunately, we don't have a lot of confidence in the Republicans stepping up and doing what is best for this country as they have exhibited over the past few years. Too many politicians are more concerned with reelection and getting rich in Washington DC than they are our Representative Republic and representing their constituents.

We must unite as Americans, not Republicans or Democrats, but Americans and speak out against this and other agencies which are darn near as bad as the EPA.
